Seating and positioning systems

interco®
System!

Active. Passive. Customized.

As a partner of the specialist trade, interco System! is a leading specialist for high-quality seating and positioning systems. The robust and durable wheelchair components are precisely adapted to the needs of the patients. Depending on requirements, these consist of seat shells and undercarriages as well as customized components such as supports and restraints.

Undercarriages

Advantages at a glance

- Flexible systems for patient-oriented individual care
- Conceptual design of patient-friendly care systems
- Perfectly matched components from a single source
- Adaptive systems and a wide range of add-on options
- Development of complete custom solutions
- Production of all solutions in our own high-tech machinery pool
- Short delivery times
- Excellent price-performance ratio

interco®
System!

Know-how. Technology. Experience.

We develop and manufacture all interco System! Seating solutions at our company headquarters in Eitorf near Bonn. Our high-tech machinery pool, the dedicated team and many years of experience ensure perfect results in the design and production of active and passive seating systems, undercarriages and custom designs.

High-tech under one umbrella

Our design and production department uses state-of-the-art processes and machines to guarantee the optimum quality of our seating systems at all times.

interco® System!

Clear responsibilities for perfect results

We support orthopedic technicians, specialist dealers and medical supply stores in the design and production of custom-made care systems. Clear responsibilities and cooperation in a spirit of partnership ensure smooth running of the project and optimum results for patients.

Analysis → Concept → Realization

Determining requirements	Concept creation	Analysis	Assumption of costs	Production	Delivery to patient
Meetings with patients, physicians, therapists, etc.	Development of care system proposal, technical outline, preparing quotation, coordination	Therapeutic fact-finding and concept form, measurement of patients	Application and coordination with the cost bearer	Production of the aid at interco, if necessary adjustment after fitting at the specialist dealer	Fine adjustment of the aid, settlement with the cost bearer

Additional support?
The illustration shows an ideal project workflow. If required, we are happy to offer further support, for example in determining requirements and providing analysis.

Promoting activity, optimizing sitting

Active seating systems

Our solutions for active sitting allow permanent, pain-free sitting in a physiological posture, promote self-mobility and at the same time ensure secure support. In this way, they support the independence of patients without compromising the necessary safety.

ERGOLINE® Aktiv

Flexible. Customized. High quality.
ERGOLINE® Aktiv is a seating system for patients who are very active despite physical limitations and whose movement sequences can be therapeutically encouraged and improved.

ERGOLINE® Light

Flexible. Customized. Carbon.
ERGOLINE® Light is an extra lightweight carbon seating system for patients who are very active despite physical limitations and whose movement sequences can be therapeutically encouraged and improved.

MIKY®

Customized. Adjustable. Active.

MIKY® is a seating system for particularly active, independent patients in childhood. The system, which is completely made to measure and can be adapted as the children grow, accompanies them during their development within the context of early support.

Providing support, optimal positioning

Passive seating systems

Our special care systems for passive sitting allow optimized sitting positions, even under complex conditions. They help in positioning deformities, compensating poor posture and avoiding decubitus. Furthermore, they also extend time periods spent in the care system.

MAGICLIGHT®

Customized. Dynamic. Suitable for vehicles.
MAGICLIGHT® is an expandable seating system in four standard sizes for children who find it difficult to assume or maintain a sitting position.

MAGICLINE®

Standardized. Modular. Robust.
MAGICLINE® is an expandable seating system for children in three sizes who find it difficult to assume a sitting position.

interco®
System!

ORTHOLIGHT®

Lightweight. Customized. Suitable for vehicles.
ORTHOLIGHT® is an extra lightweight seating system in six standard sizes for patients who find it difficult to assume or maintain their sitting position by themselves and who are only marginally active. It is manufactured customized to body dimensions or vacuum body impression.

ERGOLINE® Passiv

Flexible. Customized. High quality.
ERGOLINE® Passiv is a seating system for completely restricted or immobile patients, with the option of manufacturing according to vacuum body impression.

Ideas and quality from the specialists

Custom designs

If patient-appropriate care with standard solutions is not possible, we develop individual special solutions and support the specialist trade in their realization. To this end, we modify and supplement existing care systems or newly design individual components and complete systems.

interco®
System!

Special. Customized. Well thought-out.

Our experienced developers and our competent workshop team will find a suitable solution for virtually every challenge. For example, these include anatomically shaped reclining systems, individual holders for accessories, patient-specific undercarriages and different extensive electric wheelchairs with active seating systems.

For indoors and outdoors

Undercarriages

We offer a wide range of robust seat shell undercarriages for indoor and outdoor use. They can be combined with the various seating solutions to form an individual seating system, are crash tested and listed in the aids directory.

MINY® (Outdoor)

Small. Lightweight. Collapsible.
MINY® is the smallest undercarriage on the market. It can be combined with standardized and custom-made seating systems and used as the basis for an active wheelchair.

SIMPLY® LIGHT (Outdoor)

Lightweight. Adjustable. Safe.
SIMPLY® LIGHT is an extra lightweight, adaptable undercarriage with abducted frame for an optimal sitting position. It can be combined with different seat shells.

SIMPLY® (Outdoor)

Indoor. Outdoor. Mobile.
SIMPLY® is a functional undercarriage with abducted frame in six sizes with abducted frame for an optimal sitting position. It can be combined with different seat shells.

interco®
System!

ROOMY® NEW EDITION

Extra lightweight. Flexible. Can be lowered.

ROOMY® is a lightweight mobile seat shell undercarriage for indoor and outdoor use. The seat shell can be lowered almost to the floor and raised up to table height.

ROOMY® (Indoor)

Functional. Flexible. Adjustable.

ROOMY® is a mobile seat shell undercarriage for indoor use. The height of the seat shell can be adjusted manually.
