AKTIVLINE dynamic seat and back system

- ▶ Made of carbon or 3 mm aluminum
- ▶ With physiological pivot points in the pelvic and knee regions
- ▶ Pelvis adjustment unit and system restraint at 90°
- ▶ Anatomically contoured in the seat with adduction guides and seat upholstery attachable with Velcro
- ▶ Anatomical upholstery in the back with lateral side supports integrated and back upholstery attachable with Velcro
- ▶ Prepared for mounting of dynamic foot rest systems
- ▶ Prepared for mounting of headrest brackets and restraints
- ▶ Adapter unit for connecting the seat and back unit to selected undercarriages

Basic prerequisites for use of an AKTIVLINE Light

The outside width of the seat unit cannot exceed 40 cm at most. This means the maximum seat width for the patient is 36 cm when the upholstery is kept to the minimum of 2 cm. The maximum seat depth is 40 cm. The maximum back height of the seat shell is 50 cm.

Basic configuration

Light version	<input type="checkbox"/> Carbon version	<input type="checkbox"/> 3 mm aluminum-version
Seat part	<input type="checkbox"/> Seat part in straight version	<input type="checkbox"/> Seat part in three-piece version with adjustable abduction
Back part	<input type="checkbox"/> Back part in straight version	<input type="checkbox"/> Back part in curved version (only possible for Carbon version)
Foot rest system	<input type="checkbox"/> one-piece foot rest system	<input type="checkbox"/> two-piece leg rest system
<input type="checkbox"/> assembled on	SIMPLY LIGHT undercarriage	
	<input type="checkbox"/> 12" <input type="checkbox"/> 16" <input type="checkbox"/> 22" <input type="checkbox"/> 24" tires Aluminum base frame in slightly abducted construction, including wheels with drum brakes and full-floating rear axle, front wheels 200 x 50, parking brake handle with three latching positions, push bar with adjustable height and angle, pivotable support rollers, tilting aid and adapter mount to accommodate the seat and back	
<input type="checkbox"/> alternatively assembled on	MINY undercarriage	
	<input type="checkbox"/> 12" <input type="checkbox"/> 16" <input type="checkbox"/> 22" <input type="checkbox"/> 24" tires Aluminum base frame in slightly abducted construction, including wheels with drum brakes and full-floating rear axle, front wheels 200 x 50, parking brake handle with three latching positions, push bar with adjustable height and angle, tilt protection, tilting aid as a fold-away unit, adapter mount to accommodate the seat and back dynamically	
<input type="checkbox"/> alternatively assembled on	ROOMY NEW EDITION Indoor with 125 mm (or 100 mm) lightweight rollers	
	Including adapter receptacle to accommodate seat and back on sliding rails, including seat height and seat angle adjustment <input type="checkbox"/> constructed with manual seat height adjustment by means of gas pressure springs <input type="checkbox"/> constructed with electrical seat height adjustment (the push bar is needed for mounting an electric motor) <input type="checkbox"/> removable push bar as an option

Note

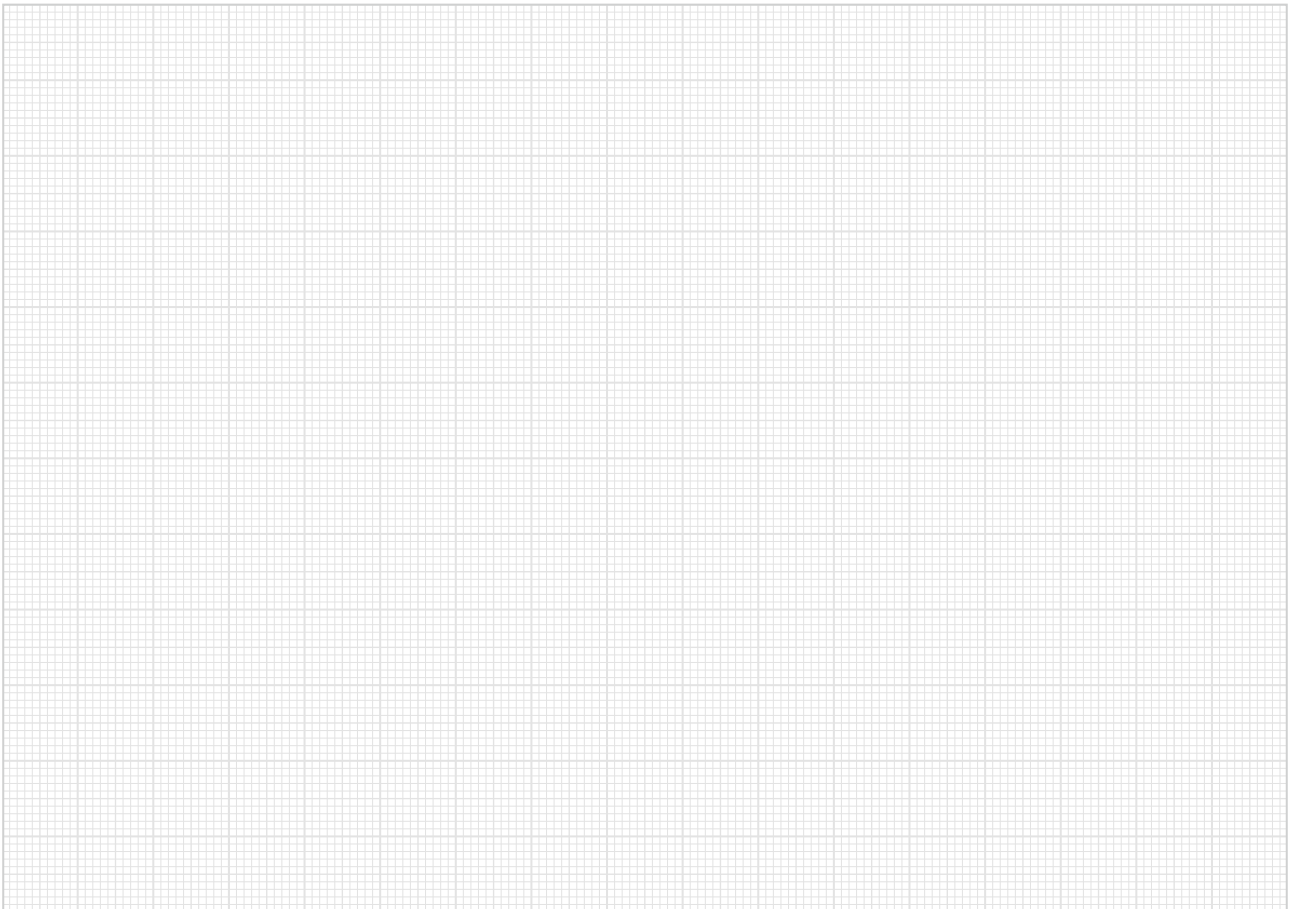

Please note that almost all options for additional special accessories can be custom-made. Please let us know what will be additionally needed for the patient, or sketch what you want on the next page.

Add-on components for medical devices, such as respirators, vacuum devices and/or oxygen bottles are possible. For these we need your detailed information about the type and possibly the dimensions of the devices.

At this point we wish you to know that the patient's measurements should be taken very carefully. Changes after the first trial sample are included in the prices provided they can result only from the trial sample and do not go beyond a bandwidth of +/- 10%.

Additional requirements beyond the first design will be billed separately; i.e. an extra charge will be applied for items that were not included in the original bid.

Notes

The AKTIVLINE concept was discussed with: _____

After successful testing, all participants have understood the concept and the chosen options and agree with this concept.
